Height-Adjustable Worksurfaces | Airtouch

# Taking a stand never felt so good.

Studies show that people who use sit-to-stand worksurfaces report significantly fewer musculoskeletal discomfort and disorders. Airtouch technology allows users to adjust naturally as they move from seated to standing postures. Its ease of adjustability lets you move your worksurface at the speed you want to: faster or slower—your choice. With Airtouch, you'll feel the ergonomic joys of a Height-Adjustable worksurface as it allows you to move throughout your day.

There are no electrical components, so there are no power cords to tie you down. It adjusts perfectly with just your touch.
