*back up against the wall? don't worry,  
dexter's here to give you some breathing room...*

With its modular, retractable components and sit-to-stand configurations, Anatome's Wall Trax computer wall mount system is the perfect space saving solution for health care, IT and industrial applications — any place where every square inch counts.

**saves space**

Wall Trax™ allows computer hardware components to be securely mounted to the wall. Moving components from the floor to the wall saves significant floor space where it's needed most.

**easy adjustability**

The most functional mounting system on the market, Wall Trax offers quick and easy adjustment with a touch of the finger — or via an easy-lock knob adjustment.

**sturdy and stability**

By evenly distributing the weight of your computer hardware components over a large area, Wall Trax™ offers increased stability. Because it's so stable, multiple components can be easily repositioned to accommodate various users.

**fits site specific needs**

Fully modular, Wall Trax™ can be customized to suit the specific task, space and user requirements of any site.

facilitate patient room data entry.

save space and time with a multiple monitor set up.

IT hardware stored safely out of the way.
